Stock Codes:

1-0 bareroot– Grown in seedbed for one year. They represent the smallest stock type and therefore the easiest to plant correctly, however, plan for some weed control.

2-0 bareroot– Grown two years in seedbed. They are bigger and better able to compete with surrounding vegetation and can withstand light to moderate browsing by wildlife.

Plug– Container grown in greenhouse for one year. Roots still encapsulated in soil. Similar to 1-0 stock in terms of planting ease, competition with surrounding vegetation, and susceptibility to browsing.
