Cascadia CD is an Equal
Opportunity Employer.

ABOUT US

Cascadia Conservation District's mission is to encourage wise
stewardship and conservation of all natural resources in
Chelan County by:

- Working to implement conservation best management
practices on the ground.
- Being an active advocate for wise land use and water
management decisions.
- Promoting a reasonable approach to environmental
problems.
- Providing locally-led, voluntary, non-regulatory solutions
to local environmental problems.
- Educating both adults and youth about natural resources
stewardship.

Cascadia CD consists of a small team of dedicated staff
focused on providing technical assistance, cost share and
building programs that serve our community and the natural
resources in Chelan County. Cascadia CD is a non-regulatory
political sub-division of Washington State and is governed by
a 5-member volunteer Board of Supervisors.

SERVICE AREA

The quality of life in Chelan County is unsurpassed,
evident by a steadily increasing population and a strong,
diverse economy. The area's natural beauty and
abundance of recreational opportunities are two of the
many reasons people come to Chelan County. It's a place
characterized by sparkling clear rivers, clean air, flowered
hillsides, expansive views, spectacular mountains,
brilliant skies, and productive orchards and farms.

From the ridge tops to the valley bottoms, Chelan
County is a spectacular place to live, work and play.

HABITAT RESTORATION TECHNICIAN II

CASCADIA CONSERVATION DISTRICT

ABOUT THE ROLE

Cascadia Conservation District is seeking a highly motivated and skilled individual to join the District as a Habitat Restoration Technician II. This full-time, benefited position will assist with the District's habitat restoration program. This position works to develop and implement habitat restoration projects to improve salmonid species and water quality in Chelan County.

The Habitat Restoration Technician II will work with landowners, crews and project partners to implement high priority habitat restoration projects. Funding for this position is provided by grants and relies on successful future grant applications. There is currently 3-years of funding secured for this position. This position reports directly to Cascadia CD's Executive Director taking direction from Resource Specialist II staff.

TYPICAL WORK

The Habitat Restoration Technician II will work closely with area partners to implement habitat restoration projects in Chelan county. A typical day may include site visits to active or prospective project sites, site maintenance and monitoring utilizing mechanical or chemical weed control methods, project implementation, assisting with grant applications, and data input and organization. This position will spend approximately 60% of their time in the field.

For a full list of duties for this position, please see the job description posted at:
https://cascadiacd.org/employment-opportunity_293.html

MINIMUM QUALIFICATIONS

A qualified candidate must have:

- An Associate's Degree involving natural resources and/or habitat restoration related sciences and one year of professional level experience. No degree is required if the applicant has four years or more of applicable experience.
- Very strong organizational and written/verbal communication skills.
- Experience working with private landowners
- Demonstrated the ability to handle multiple projects
- Capability of working with diverse individuals and small groups.
- Experience assisting with implementation of habitat restoration projects such as LWD, culvert replacement, beaver dam analogs, riparian plantings or other watershed restoration projects.
- Able to work in remote and rugged locations under a variety of weather conditions, traverse difficult upland and instream terrain, and carry field equipment necessary to complete required job tasks.
- Strong knowledge of MS Office applications (Word, Excel are essential).
- Valid driver's license.

DESIRED ATTRIBUTES

A well-qualified candidate will have some or all of the following qualifications:

- Ability to communicate in English and Spanish
- Experience operating and maintaining landscape equipment
- Competency with GIS software and GIS analysis
- Experience working with conservation districts, and NRCS
- Experience working with community groups
- Experience utilizing Drones in the field

Those meeting 2 or more of the desired attributes are encouraged to apply
