To Order:

Fill out the accompanying order form and drop it by or mail it along with a check made payable to...

Cascadia Conservation District
14 N Mission St.
Wenatchee, WA 98801

All orders must be received by March 1st, 2019.

A minimum 50% deposit is required to guarantee your order. Fully prepaid orders are greatly appreciated.

Plant Pick-Up:

Plants will be distributed on March 23rd, 2019 at the Stemilt Growers Warehouse in north Wenatchee. A map to the site will be sent to you along with a reminder as the pickup date draws near. Please be aware that any plants not picked up will be considered abandoned and used for conservation projects.

Questions:

Contact our office at (509) 436-1601.

Native Planting 101 Workshop
Saturday, January 12th, from 12 pm to 4 pm

Come learn about how to successfully incorporate native plants into your landscape!

Volunteers Needed

Come help us prepare and distribute plants. We would love to have your assistance!

Plant Preparation
Saturday, March 16th, from 1 pm to 5 pm

Plant Distribution
Saturday, March 23rd, from 9 am to 2 pm

For more information or to RSVP to any of these events, please contact Justine Bula at (509) 436-1601 or visit www.cascadiacd.org.

Bring gloves, a lunch & warm clothes. We will provide light refreshments and fun!

Come Join Us!

Our Plants

We provide high quality, conservation grade plants for sale this year. All of the species we are offering are native to eastern Washington and most are grown from eastern Washington seed stock by the Washington Association of Conservation Districts (WACD) Plant Materials Center in Skagit County.

Many of the plants we are offering are also considered fire-resistant and make excellent choices for your FireWise landscaping. For more information visit www.firewise.org.

Plants of "1-0" stock type are bare root, meaning they do not come in pots or burlap bags. They are harvested from the field in winter when the plants are dormant and arrive ready to be replanted. Plants of "plug" stock type have roots still encapsulated in soil.

Choosing the stock type is one of the most important factors that determine plant survival and success. Depending on the species you select, plants are available as...

1-0 bare root (1-0) - Grown in seedbed for one year. They represent the smallest stock type and therefore the easiest to plant correctly, however, plan for some weed control.

2-0 bare root (2-0) - Grown two years in seedbed. They are bigger and better able to compete with surrounding vegetation and can withstand light to moderate browsing by wildlife.

Plug - Container grown in greenhouse for one year. They are similar to 1-0 stock in terms of planting ease, competition with surrounding vegetation, and susceptibility to browsing.

</thead>
<tbody>
<tr>
<td><strong>Conifers</strong></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Ponderosa Pine</td>
<td>100+ feet</td>
<td>Grows in a wide range of soils with adequate sunlight, moisture &amp; drainage.</td>
<td>Reddish-brown bark smells like vanilla. Attractive needles and cones. Used for site restoration.</td>
<td></td>
<td>April-June</td>
</tr>
<tr>
<td><strong>Deciduous Conifers</strong></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Western Larch</td>
<td>100+ feet</td>
<td>Grows in a wide range of soils with adequate sunlight, moisture &amp; drainage.</td>
<td>Its seeds are eaten by several species of birds and mammals, and grouse eat the fallen needles. Its bright gold autumn color is valued in the ornamental industry, and even more spectacular in large native stands.</td>
<td></td>
<td>Oct-Mar</td>
</tr>
<tr>
<td><strong>Deciduous Trees</strong></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Rocky Mt. Maple</td>
<td>10-30 feet</td>
<td>Grows in a wide range of soils from moist lowland to dry upland with adequate moisture.</td>
<td>Glossy reddish-bark with vibrant green leaves that turn red in the fall. Used for soil stabilization and to improve wildlife habitat, important big game browse species as a winter food source.</td>
<td></td>
<td>April-June</td>
</tr>
<tr>
<td><strong>Shrubs</strong></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Blue Elderberry</td>
<td>25 feet</td>
<td>Grows in a wide range of soils with adequate moisture &amp; drainage.</td>
<td>Edible berries attract many bird species and can be used in preserves and drinks. Quick to establish, used as a conservation species for riparian habitat restoration and erosion control.</td>
<td></td>
<td>May-July</td>
</tr>
<tr>
<td>Golden Current</td>
<td>4-7 feet</td>
<td>Grows in a wide range of soils with adequate moisture &amp; drainage.</td>
<td>Edible berries, tart in flavor &amp; used in jams and jellies. Excellent soil stabilization. Provides browning for wildlife. Useful for windbreaks &amp; hedges.</td>
<td></td>
<td>April-June</td>
</tr>
<tr>
<td>Mock Orange</td>
<td>6-12 feet</td>
<td>Grows in a wide range of soils with adequate moisture &amp; drainage.</td>
<td>Fragrant, showy white flowers in late spring. Used for soil stabilization and site restoration. Excellent soil and streambank stabilizer, and an important wildlife species.</td>
<td></td>
<td>May-July</td>
</tr>
<tr>
<td>Serviceberry</td>
<td>6-15 feet</td>
<td>Grows across a wide range of soil, sun exposure, and terrain steepness.</td>
<td>Fragrant white flowers in late spring. Sweet, edible berries in summer, and attractive foliage in fall. Used for soil stabilization and site restoration.</td>
<td></td>
<td>May-June</td>
</tr>
<tr>
<td>Rugosa Rose</td>
<td>6-8 feet</td>
<td>Grows in a wide range of soils with adequate moisture and drainage.</td>
<td>Fragrant pink flowers in summer and rosehips in fall. Important food and habitat source for many birds and mammals.</td>
<td></td>
<td>May-July</td>
</tr>
<tr>
<td>Red Osier Dogwood</td>
<td>15'-20'</td>
<td>Grows in a wide range of soils with adequate sunlight, moisture &amp; drainage.</td>
<td>The red stems provide striking winter interest, and its clusters of small white flowers are showy in spring. The clusters of white berries provide color in late summer, and the leaves turn reddish in the fall.</td>
<td></td>
<td>Oct-Mar</td>
